Location: Gujarat, India

PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Frontend Developer and MCA student with a solid BCA foundation and hands-on experience developing 2+ dynamic web applications using HTML5, CSS3, JavaScript (ES6+), and PHP. Proven competency in building responsive user interfaces, client-side & server-side form validations, RESTful API integrations, and secure application architecture. Eager to contribute technical skills to impactful projects while accelerating mastery of modern web technologies.

TECHNICAL ARSENAL & CORE COMPETENCIES

Frontend:	HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, Responsive Web Design, DOM Manipulation
Backend & DB:	PHP, Python, MySQL (CRUD Operations, Relational Schema Design)
Security & Practices:	Client & Server-Side Data Validation, Web Application Security Fundamentals, XSS Prevention
Tools & Environment:	Git & GitHub, Visual Studio Code, Chrome DevTools, Postman

WORK EXPERIENCE & TRAINING

Web Development Trainee 2025 (3 Months)
eMatrix Infotech Pvt. Ltd. | Coursera Professional Training Program

- Completed an intensive 3-month hands-on training program in modern web design and full-stack development.
- Developed and tested interactive, mobile-responsive web interfaces utilizing HTML5, CSS3, JavaScript (ES6+), and PHP.
- Implemented end-to-end client-side and server-side form validations to ensure data integrity and prevent security flaws.
- Conducted rigorous cross-browser testing, debugging, and code optimization under professional technical mentorship.

FEATURED PROJECTS

AI-Powered Agriculture E-Marketplace System (AgroKart) PHP, MySQL, JavaScript, Bootstrap

- Engineered an e-commerce platform bridging rural agricultural producers with commercial buyers and consumers.
- Implemented advanced product catalog search, category filtering, vendor inventory tracking, and order management.
- Integrated an AI-assisted customer support chat interface for streamlined buyer inquiry handling.

Library Management System HTML, CSS, JavaScript, PHP, MySQL

- Developed a comprehensive digital portal to eliminate manual book logging and automate university library operations.
- Features include member registration, book issue/return ledger tracking, real-time inventory checks, and fine calculation.
